

# DBMS project UI and backend database

Ankur | Aman | Tarun

Link to the project folder - [LINK](#)

# Flow Chart

Note: All colored boxes are also notified in 'old leave status'.

# Constraints:

1. Colored boxes are updated in old leave status.
2. In whole process, a trigger will be used - if at any step, the date for applied leave crosses the present date, the leave will be auto-rejected.
3. If a leave is in process, new leave cannot be processed.
4. If a faculty leaves institute, he/she cant apply for new leaves.
5. If faculty applies for more leaves than available, maximum possible leaves will be deducted.
6. Director can change Dean FAA and Dean SP, and all HODs.
7. If an HoD is changes, new HoD must be placed in his/her position.
8. Comments on an application are visible to every cross cutting faculty.
9. Projects can be created by any faculty, and details can be filled by PI or co-PI.
10. Approved projects are visible to every project head.

Will use 10 tables:

1. **Faculty (f)**
2. **Leave\_in\_process (lip)**
3. **Leaves\_data (ld)**
4. **Leave\_comments (lc)**
5. **Users**
6. **Current\_users**
7. **Project**
8. **Project data**
9. **Budget**
10. **faculty\_sp**

## Table 1: Faculty

For data of whole faculties + hod + dean + director

[illegible]

## Table 2: leave\_in\_process

Gives data about leaves which are in process (does not contain outdated leave data)

| Faculty_id                  | Applied on                     | Leave_id                | status  | Directed to           | Leave start date | number_of_leaves         |
|-----------------------------|--------------------------------|-------------------------|---|-----------------------|------------------|--------------------------|
| Connect table 1 and table 2 | Date of application submission | Specific for each leave | Pending / approved / rejected / auto-rejected | HOD / Dean / Director |                  | Leave for how many days? |
|                             |                                |                         |   |                       |                  |                          |

# Table 3: Leaves\_data

This table has record of all (previous + current) leaves

| Faculty_id | Leave_id | Status   | Applied on | verdict_date | Leave start date | Number of leaves |
|------------|----------|--|------------|--------------|------------------|------------------|
|            |          | Accepted /<br>rejected /<br>pending /<br>auto-rejected |            |              |                  |                  |
|            |          |  |            |              |                  |                  |

# Table 4: Leave\_comments

Includes data for comments for all leaves - previous + current

| Leave_id | Comment_id | faculty_id | Comment by                      | Comment  | Forwarded to          | date_of_comment |
|----------|------------|------------|---------------------------------|----------|-----------------------|-----------------|
|          |            |            | Faculty / hod / dean / director | A string | Hod / dean / director | Date of comment |
|          |            |            |                                 |          |                       |                 |

## Table 5: Users

For ease of setting up passwords, username is same as password in the default database we used, but it can be set anything by the faculty. A new faculty can register as well. Also admin can de-enroll a faculty as well.

| username | password |
|----------|----------|
| rpr001   | rpr001   |
|          |          |

Table 6: current\_users

| <b>faculty_id</b> |
|-------------------|
| rpr001            |
|                   |

Table 7: Project

| Project_id | project_name | project_description | main_pi | co1 | co2 | co3 | co4 | co5 |
|------------|--------------|---------------------|---------|-----|-----|-----|-----|-----|
|            |              |                     |         |     |     |     |     |     |

Table 8: Project\_data

| project_id | directed_to                | status                                      |
|------------|----------------------------|---|
|            | 1 = main PI<br>2 = Dean SP | 0 = Pending<br>1 = Approved<br>2 = Rejected |
|            |                            |   |

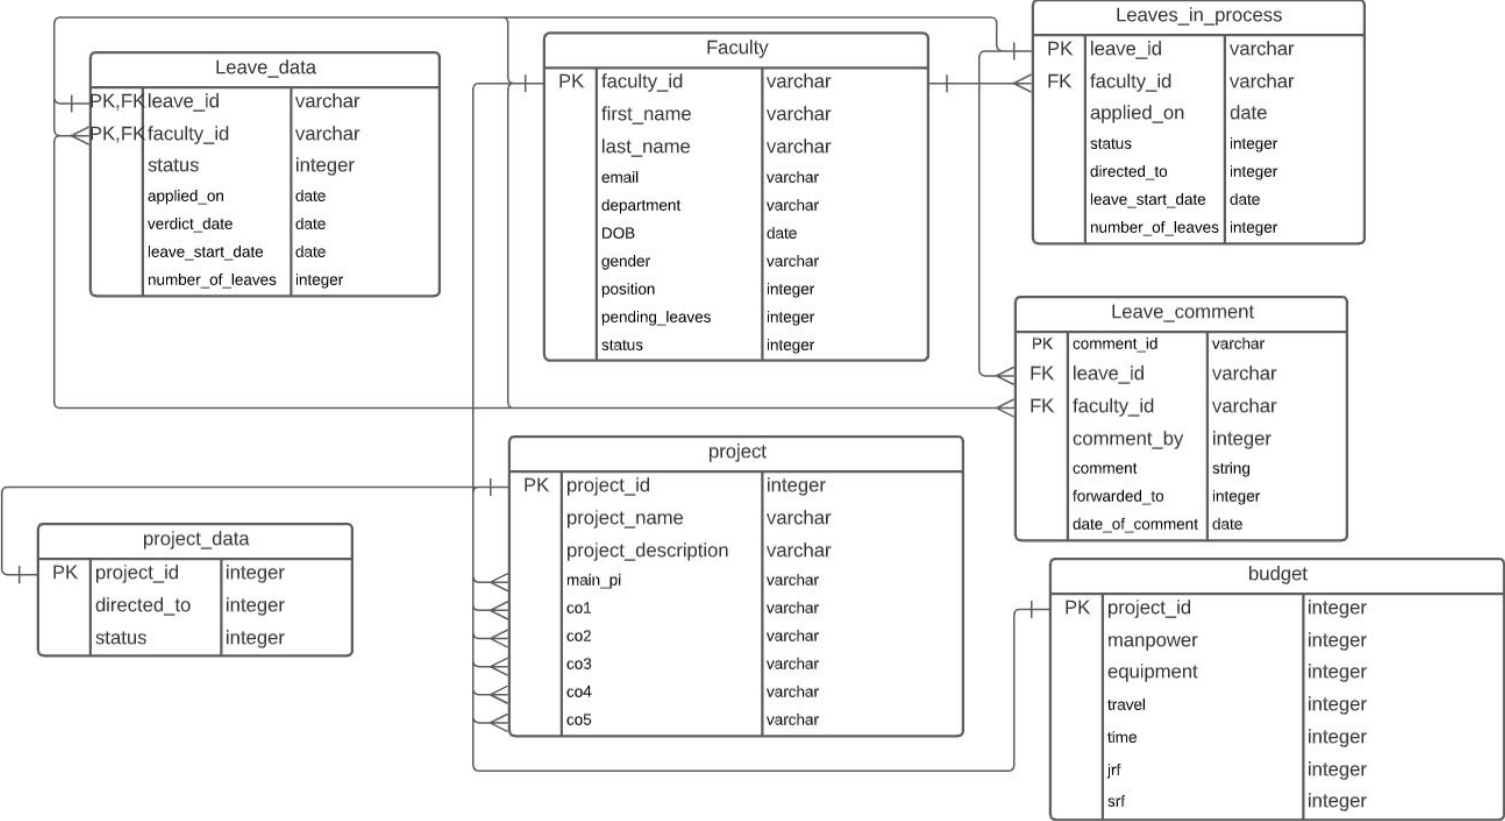

Table 9: Budget

| project_id | manpower | equipment | travel | time      | jrf            | srf            |
|------------|----------|-----------|--------|-----------|----------------|----------------|
|            | In Rs.   | In Rs.    | In Rs. | In months | Number of JRFs | Number of SRFs |
|            |          |           |        |           | (Salary fixed) | (Salary fixed) |

Table 10: faculty\_sp

| faculty_id                 |
|----------------------------|
| Faculty ID of only Dean SP |
|                            |

# ERD

# Use 5 interfaces UI

1. Login Portal
2. Faculty Profile Portal
3. Faculty Portal
4. HOD portal
5. Dean Portal
6. Director Portal
7. Projects Portal
8. Approve projects (only for Dean SP)

# Faculty Portal

Login credentials - faculty\_id + password

| Profile  | Apply new leave                                   | Old leave status  |
|--|---|---|
| Faculty id, Name, Dept, Age, Gender, Aadhar card, Univ status, No. of leaves pending | <i>Only active if old leave status NULL</i>       | Old leave at which level?<br>Comments made by HoD / Dean / Director |
|  | Ask for - Date of start, number of days, comments | Provision to add comments and direct to anyone                      |
|  |   |   |

# HOD portal

Login credentials - faculty\_id+ password

It will have a special section to approve, reject or send back leave applications with comments. Only those applications will be visible here which are supposed to be approved by HOD

# Dean Portal

Login credentials - faculty\_id + password

It will have a special section to approve, reject or send back leave applications with comments. Only those applications will be visible here which are supposed to be approved by Dean.

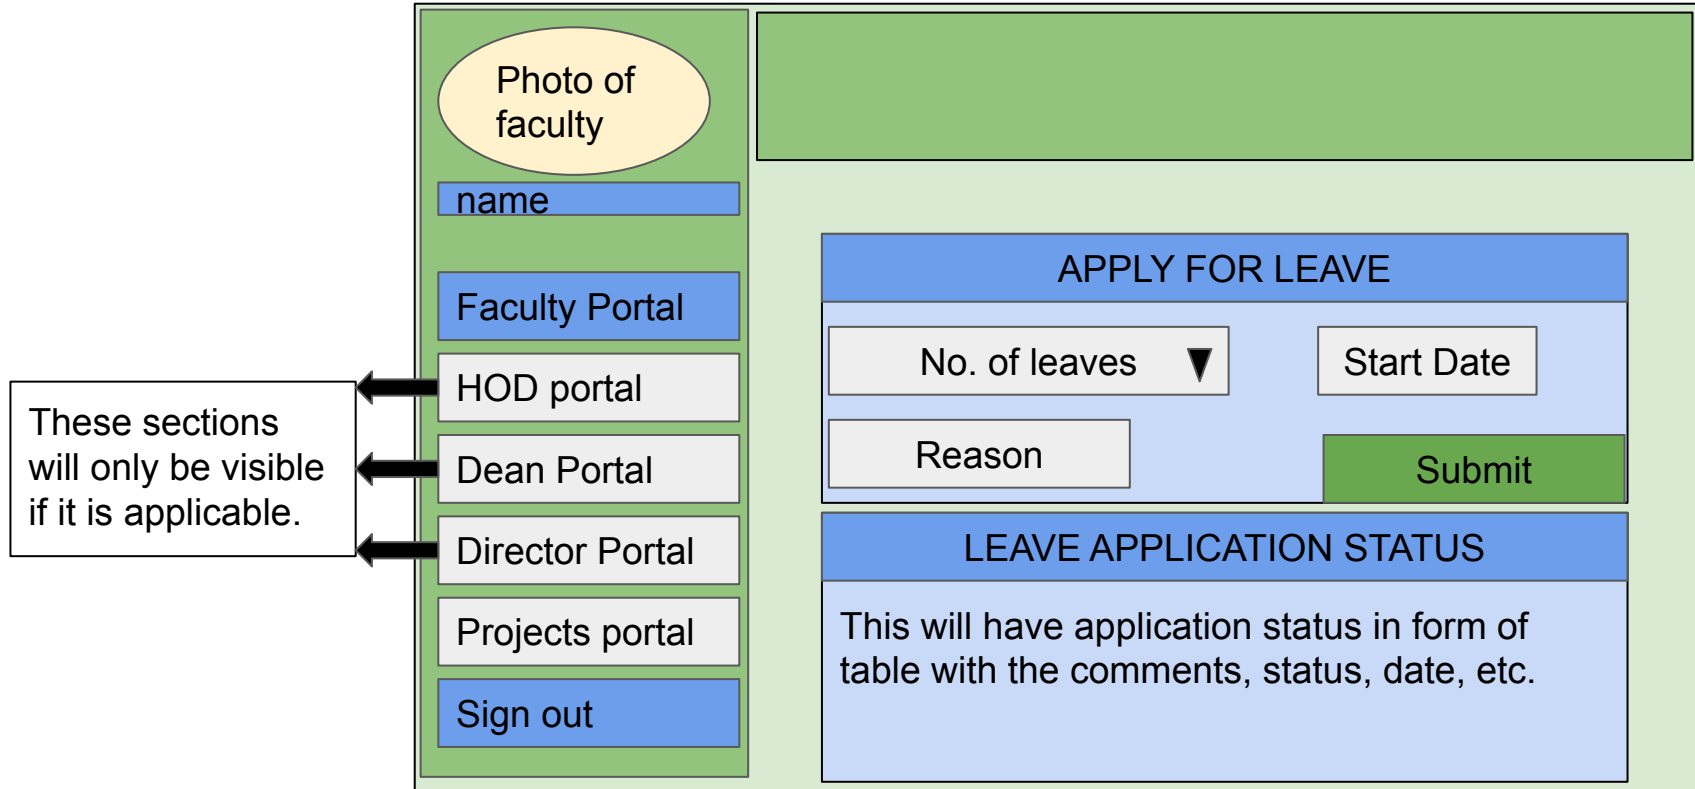

Dean sponsored projects and dean SA are different and have different portals.

# Director portal

Login credentials - faculty\_id + password

Director portal has a special privilege to change dean or HOD at anytime. Also leave application approval portal will be visible.

# UI

|   | Faculty              |                                     | HoD                  |                                  |                              | Dean                 |                                     |                              | Director |                 |                              |
|---|----------------------|-------------------------------------|----------------------|----------------------------------|------------------------------|----------------------|-------------------------------------|------------------------------|----------|-----------------|------------------------------|
|   | Apply                | Status                              | Apply                | Status                           | Approve/<br>reject /<br>back | Apply                | Status                              | Approve/<br>reject /<br>back | Apply    | Status          | Approve/<br>reject /<br>back |
| <b>Retrieve data from</b>                         | Faculty              | Lip<br>Lc<br>Ld                     | Faculty              | Lip<br>Lc<br>Ld                  | Lip<br>Lc                    | Faculty              | Lip<br>Lc<br>Ld                     | Lip<br>Lc                    | Faculty  | Lip<br>Lc<br>Ld | Lip<br>Lc                    |
| <b>Clicking on button will trigger changes in</b> | Lip<br>Lc<br>Faculty | Lip<br>Lc<br>Ld<br>final<br>verdict | Lip<br>Lc<br>Faculty | Lip<br>Lc<br>Ld final<br>verdict | Lip<br>Lc<br>Ld, if reject   | Lip<br>Lc<br>Faculty | Lip<br>Lc<br>Ld<br>final<br>verdict | Lip<br>Lc<br>Ld              | Ld       | -               | Lip<br>Lc<br>Ld              |
|   |                      |                                     |                      |                                  |                              |                      |                                     |                              |          |                 |                              |

**Lip = Leave in process, Lc = Leave\_comments, Ld = Leave Data**

# Cases

1. Faculty / HoD / Dean / Director applies for leave
2. Faculty / HoD / Dean comments in status portal
3. HoD approves / rejects / revert backs the leave request in approve portal
4. Dean approves / rejects / revert backs the leave request in approve portal
5. Director approves / rejects / revert backs the leave request in approve portal
6. Auto-reject for retro leave applications
7. Faculty applies for a project
8. Main PI or co PI could fill the details of project
9. Dean / Main-PI can approve or reject project

## Case 1: Click is on 'apply' button

If `faculty.position < 3`: Add an entry in `Lip`, `Lc` (if any comments attached) and change number of pending leaves in `faculty`.

Else: add an entry in `Ld`, `Lc` (if comments attached) and change number of pending leaves in `faculty`.

## Case 2: Change in 'status' portal - comment button clicked

add an entry in Lc, update entry in Lip - in all cases, irrespective of faculty.position

Take care of directed\_to variable.

Imp: This portal won't exist for director.

## Case 3: Approve / reject / revert back by HoD

If hod approves: Edit entry in Lip, Add entry in Lc (if comments attached).

Else if hod reverts back: update Lip, add entry in Lc.

Else if hod rejects: create an entry in Ld, delete entry from Lip, add entry in Lc (if comment attached).

## Case 4: Approve / reject / revert back by Dean

If dean approves: 2 cases

If future date leave: Add entry in Ld, delete entry in Lip, Add entry in Lc (if comment)

If past date leave: Update Lip, Add entry in Lc (if comment)

Else if dean reverts back: update Lip, add entry in Lc.

Else if dean rejects: create an entry in Ld, delete entry from Lip, add entry in Lc (if comment attached).

## Case 5: Approve / reject / revert back by Director

If director approves: Create entry in Ld, delete entry from Lip, Add entry in Lc (if comments attached).

Else if director reverts back: update Lip, add entry in Lc.

Else if director rejects: create an entry in Ld, delete entry from Lip, add entry in Lc (if comment attached).

## Case 6: user signs up

New user signs up, store data in users table

## Case 7: User logs in

Check values from users table

Clear current\_users table

Edit / Insert new entry in current\_users

# All time triggers

Trigger1: Auto-reject if future leave and today date = leave date: create and entry in Ld, delete entry from Lip

Trigger2: Keep scanning Ld, for final verdicts of all leaves app

# Steps to link php and database

1. Download XAMPP
2. Open xampp-control and connect apache and mysql
3. In local browser, open localhost/phpmyadmin
4. Create new database - dbms\_project
5. Use code generated by lucid charts to generate tables
6. Create csv file of faculty sheet and import data in faculty table

***continued***

1. In xampp, there must be a folder htdocs.
2. Delete existing files in htdocs
3. Create an index.php file and a new folder 'includes'
4. Inside 'includes' folder, create an dbh.inc.php (database handler) and ak.sql (command calling) files
5. Code for all three files in upcoming slides

**IMP: Design algo in terms of stored procedures and call those functions in .sql files, when needed.**

# Stored procedures

There are 10 stored procedures used in this project.

They can be found in the folder shared with codes of the whole project with names  
stored\_procedures\_x.sql

| Stored Procedure name | Input variables   | Functions   |
|-----------------------|---|---|
| submitbutton          | Faculty_id, leave_start_date, no. of leaves, comment                          | Create a new leave                                  |
| nextbutton            | Leave_id, comment, action_taken (0-reject, 1-forward/accept, 3-revert back)   | Approve / reject / revert back application          |
| checkyearend          | -   | Update leaves at end of year                        |
| addcomment            | Leave_id, comment   | Add a new comment to application                    |
| autodelete            | -   | Add back leaves for a faculty, if leave is rejected |
| change_por            | Faculty_id, identifier  | Change dean or HoD by director                      |
| createproject         | Name of project, description, main, co1, co2, co3, co4, co5                   | Create a new project                                |
| apply                 | Faculty_id (logged), project_id, manpower, equipment, travel, month, srf, jrf | Fill the details of project                         |
| approve_pi            | Project_id, decision (1-approve, 2-reject)                                    | approve / reject by main PI                         |
| approve_dean          | Project_id, decision  | approve / reject by dean SP                         |
